BLAST PROOF/LIGHT WEIGHT/TRANSLUCENT

Heavy duty polyethylene treated with resin & chemicals in the composite layer of cylinder assures 100% **Safety from Explosion**. **Highly Safe** composite material does not expand unlike metals.

Light in weight (about half of weight than metal cylinders) gives convenience to move. Thus, suitable for spine health & no damage to floor. Makes life easy even for elderly.

The translucent **visibility** enables one to check the level of liquid gas. this not only ensures complete value for money, but also gives freedom from sudden exhaustion of Gas.

Handles for easy lifting, space for regulator fitting, attractive color & elegant design gives **aesthetic** value & convenience with outer casing that suits for rough handling.

**Certified
Safety**

Passed through Stringent tests

- Hydraulic proof pressure test
- Hydraulic expansion test
- Cylinder burst test
- Ambient cycle test
- Vacuum test
- Environmental cycle tests
- High temperature creep test
- Flow test
- Drop test
- Gunfire test
- Fire resistance test
- Permeability test
- Torque test on neck boss
- Leak test
- Pneumatic cycle test
